Charges in addition to those indicated above for customers having sewage with characteristics differing from normal domestic sewage, such as wastewater with an elevated biochemical oxygen demand or industrial wastewater containing heavy metals or other unusual constituents, or wastewater having unusually high intermittent flows:

110 percent of all costs incurred by company for collection, treatment, sampling, analysis, monitoring, administration, professional services, facilities, and equipment which would not have been incurred if customer's sewage had been normal domestic sewage.

Minus Return Flow Use Credit:

\$.174 for each 1,000 gallons of average monthly winter water use, prorated per 100 gallons.

MONTHLY MINIMUM:

Customer Charge plus applicable taxes.
